DETAILED ACTION
EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Chris Arena on September 19, 2006.

The application has been amended as follows:

4. The system according to claim 3, wherein the client application further comprises a registration service wherein the computer user may register for a service provider from the plurality of service providers.

5. The system of claim 4, wherein registration and authentication for each service provider for which the computer user registers is populated to the distributed system network.

7. The system of claim 5, wherein the registration, activation and authentication for each service provider occurs via a single data service.

14. The system of claim 13, wherein the computer user may select the service provider from a plurality of available service providers sing a service provider selection tool.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to teach neither singly nor in combination, the claimed limitations of "a distributed system network having at least one receiving router for receiving communication from the computer device having the client application; and at least one tunnel server, each at least one tunnel server connecting the at least one receiving router with at least one transmitting router, the at least one transmitting router communicating with at least one service provider, wherein the computer user can select, using the client application, a one service provider from a plurality of available service providers using a single high-speed data connection via the at least one tunnel server, before the computer device with the client application is connected to a network associated with the one service provider." as stated in claim 1. These limitations, in conjunction with other limitations in the independent claim, are not specifically disclosed or remotely suggested in the prior art of record. A review of claims 1-14 indicates that claims 1-14 are allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian J. Gillis whose telephone number is 571-272-7952. The examiner can normally be reached on M-F 7:30-5:00.
